LIST OF CONTENTS

NUMBER 1

J. Kucwaj and J. Orkisz	1	Computer approach to the R-functions method of solution of boundary value problems in arbitrary domains
A. Venkatesh, P. V. Ramana Murthy and K. P. Rao	13	Finite element analysis of bimodulus composite stiffened thin shells of revolution
H. Awaji, A. T. Yokobori, Jr. and T. Yokobori	25	The variation of the stress singularity at the notch tip as notch angle and radius of curvature
L. G. Tham, W. Y. Li, Y. K. Cheung and M. J. Chen	31	Bending of skew plates by spline-finite-strip method
N. Carpenter, T. Belytschko and H. Stolarski	39	Locking and shear scaling factors in C^0 bending elements
C. H. Yoo and S. V. Acra	53	Cross sectional properties of thin-walled multi-cellular section
D. M. Frangopol	63	Computer-automated sensitivity analysis in reliability-based plastic design
M. Isreb	77	Australian standard rolled sections design invariant parameters
C. Mei	83	Discussion of finite element formulations of non-linear beam vibrations
R. J. Balling, A. R. Parkinson and J. C. Free	87	Methods for interfacing analysis software to optimization software
	I	Software survey section ISH-BASIC SHIP DESIGN PACKAGE

NUMBER 2

R. Hussein and M. Morsi	99	Framework methods for orthotropic plates
R. C. Kar	115	Stability of a rotating pretwisted non-uniform cantilever with a tip mass subjected to dissipative and follower forces
T. K. Varadan, B. S. S. Kumar and G. Prathap	123	A general iterative numerical approach to the finite deflection analysis of beams
H. A. El-Ghazaly and A. N. Sherbourne	131	Deformation theory for elastic-plastic buckling analysis of plates under nonproportional planar loading

S. N. Patnaik	151	The integrated force method versus the standard force method
Om P. Agrawal and A. A. Shabana	165	Automated visco-elastic analysis of large scale inertia-variant spatial vehicles
D. T. Nguyen and J. L. Rogers, Jr.	179	Optimal design of structures with multiple design variables per group and multiple loading conditions on the personal computer
S. D. Rajan and M. A. Bhatti	185	SADDLE: A computer-aided structural analysis and dynamic design language—Part I. Design system
S. D. Rajan and M. A. Bhatti	205	SADDLE: A computer-aided structural analysis and dynamic design language—Part II. Database management system
	I	Software survey section
NUMBER 3		
C. Z. Karakostas, C. C. Baniotopoulos and P. D. Panagiotopoulos	213	Sea bed-structure interaction for submarine cables
C. C. Hsieh and J. S. Arora	225	Algorithms for point-wise state variable constraints in structural optimization
G. A. Mohr and R. S. Mohr	239	A new thin plate finite element by basis transformation
C. H. Yoo and C. R. Siegel	245	Column loadings on telescopic power cylinders
O. G. Vinogradov	253	Algorithm of stiffness matrix inversion based on substructuring concept
D. A. Dunavant and C. Cheng	261	On the monotonic convergence of the eigensolution by the <i>h</i> -version of the finite element method
H. Adeli and K. Phan	267	Interactive computer-aided design of non-hybrid and hybrid plate girders
D. Zimmerle	291	Generation of variable order elements by super-element generation
R. Natarajan	299	A simplified pipe flexibility analysis program—stiffness method
K. Kanaka Raju and G. Venkateswara Rao	307	Post-buckling of linearly tapered, moderately thick circular plates by finite element method
N. U. Khan and K. A. Ansari	311	On the dynamics of a multicomponent mooring line
P. C. Dumir and K. N. Khatri	335	Axisymmetric static and dynamic buckling of orthotropic truncated shallow conical caps

S. Swaddiwudhipong, T. Balendra, S. T. Quek and S. L. Lee	343	Computer program for the analysis of asymmetric frame-shear wall structures
L. S. Wang and K. M. Hsiao	363	Cyclic elastic-plastic creep steady-state analysis by the finite element method
R. V. Grandhi, R. T. Haftka and L. T. Watson	373	Efficient identification of critical stressés in structures subject to dynamic loads
J. D. Whitcomb	387	A simple rectangular element for two-dimensional analysis of laminated composites
F. W. Williams and M. S. Anderson	395	Inclusion of elastically connected members in exact buckling and frequency calculations
H. V. S. Ganga Rao and H. J. Farran	399	Macro-element analysis of skewed and triangular orthotropic thin plates with beam boundaries
C. Manu	405	Dynamic analysis of structures with closely spaced modes using the response spectrum method
T. Kant and P. B. Kulkarni	413	A C^0 continuous linear beam/bilinear plate flexure element
V. Ramamurti and P. Balasubramanian	427	Static analysis of circumferentially periodic structures with Potters' scheme
S. A. Ali and S. I. Al-noury	433	Nonlinear dynamic response of rectangular plates
V. A. Profillidis	439	Applications of finite element analysis in the rational design of track bed structures
E-S. B. Machaly	445	Buckling contribution to the analysis of steel trusses
G. J. Turvey and G. T. Lim	459	A parametric study of the axisymmetric full-range response of thickness-tapered circular steel plates
L. A. Godoy	469	Ill-conditioned stars in the finite difference method for arbitrary meshes
W. Przybyłó	475	A new approach to the calculations of the limit load of steel structure supports of electric overhead lines of the highest tensions
J. Padovan and J. Lackney	479	Hierarchical implicit dynamic least square solution algorithm
C. S. Smith	491	Application of folded plate analysis to bending, buckling and vibration of multilayer orthotropic sandwich beams and panels
M. A. M. Torkamani	499	A linear yield surface in plastic cyclic analysis

ALSA (ACCURATE LARGE-ORDER STRUCTURAL ANALYSIS)

NUMBER 4

- | | | |
|---|-----|---|
| C-M. Wang, V. Thevendran,
G. I. N. Rozvany and
N. Olhoff | 519 | Optimal plastic design of circular plates: Numerical solutions and built-in edges |
| N. S. Putcha and J. N. Reddy | 529 | A refined mixed shear flexible finite element for the nonlinear analysis of laminated plates |
| B. G. Prakash and
M. S. S. Prabhu | 539 | Reduction techniques in dynamic substructures for large problems |
| H. C. Rhee and S. N. Atluri | 553 | Polygon-circle paradox in the finite element analysis of bending of a simply supported plate |
| Ch. U. A. Bucher | 559 | A modal synthesis method employing physical coordinates, free component modes, and residual flexibilities |
| S-X. Gong and F. Fujii | 565 | Blending functions used in discrete and nondiscrete mixed methods for plate bending |
| H. Chen and E. Krempl | 573 | An adaptive time-stepping scheme for the viscoplasticity theory based on overstress |
| H. Chen, M. M. Little and
E. Krempl | 579 | A plane stress formulation of the viscoplasticity theory based on overstress |
| W. J. T. Daniel | 583 | A coupled finite element/one-dimensional wave model of stress wave propagation in a shock tube |
| A. L. Yettram and
C. J. Brown | 589 | The elastic stability of square perforated plates under bi-axial loading |
| H.-O. May | 595 | The conjugate gradient method for unilateral problems |
| A. N. Sherbourne and
H. A. El-Ghazaly | 599 | Ultimate capacity of nonsymmetrical moment connections: Review and parametric study |

S. N. Patnaik	619	Behaviour of trusses with stress and displacement constraints
H. Chen and E. Krempl	625	A two-step finite-element time-integration scheme for the viscoplasticity theory based on overstress
F. F. Mahmoud, N. J. Salamon and T. P. Pawlak	629	Simulation of structural elements in receding/advancing contact
D. M. Frangopol	637	Influence of load and strength correlation on the reliability of ductile systems
A. Tralli	649	A simple hybrid model for torsion and flexure of thin-walled beams
A. H. Patel and R. Ali	659	Finite-element model development of a uniformly loaded simply supported beam using strain energy density criterion
N. Ramachandra Rao and K. V. Valsarajan	665	An integral-equation solution for the finite deflection of clamped skew sandwich plates
C-G. Aronsson and J. Bäcklund	669	Sensitivity analysis of the damage zone model
P. C. Dumir, Ch. R. Kumar and M. L. Gandhi	677	Nonlinear axisymmetric vibration of orthotropic thin circular plates with elastically restrained edges
L. G. Tham, A. H. C. Chan and Y. K. Cheung	687	Free vibration and buckling analysis of plates by the negative stiffness method
G. D. Manolis, D. E. Beskos and B. J. Brand	693	Elastoplastic analysis and design of gabled frames
R. A. Ibrahim and T. D. Woodall	699	Linear and nonlinear modal analysis of aeroelastic structural systems
D. H. Ferriss	709	Large transverse deflections of circular plates loaded symmetrically
D. Ganapathi Rao, V. Ramamurti and S. Narayanan	725	Stress analysis of ribbed flanges

I Software survey section

NUMBER 5

G. J. Turvey and N. G. V. Der Avanessian	737	DR analysis of beams using graded finite differences
T. K. Hellen	743	A novel approach to crack-tip singularity solutions
H. Alaylioglu	749	A computer algorithm for generating analytically integrated hierarchical hybrid stress elements

M. Isreb	759	Electrical-structural finite element analysis software design
W. Ostachowicz and D. Szwedowicz	763	Vibrations of beams with elastic contact
J. D. Lee	773	Finite element formulations for large strain incompressible elastic-plastic solid
A. Rosen and O. Rand	785	Numerical model of the nonlinear behavior of curved rods
H. J. Braudel, M. Abouaf and J. L. Chenot	801	An implicit and incremental formulation for the solution of elastoplastic problems by the finite element method
M. Sambasiva Rao	815	An evaluation of base-excitation response analysis using ASKA
E. A. Sadek	823	An optimality criterion method for structural optimization problems
B. Espion	831	Nonlinear analysis of framed structures with a plasticity minded beam element
M. S. Gadala	841	Numerical solutions of nonlinear problems of continua—II. Survey of incompressibility constraints and software aspects
N. Kuppuraju and F. Mistree	857	Compromise: An effective approach for solving multiobjective structural design problems
R. Delpak, V. Peshkam and Z. G. Azizian	867	A theoretical energy approach in predicting the elastic nonlinear behaviour of thin rotational shells and other continua
	I	Software survey section

NUMBER 6

J. P. Sadler, R. A. Apanian, M. J. Gilberg and C. P. Kipp	877	Finite element analysis of the captive column structure
C. J. Wong	889	Analysis of some paper handling problems by a three-dimensional nonlinear finite element algorithm
A. F. Sayegh and F. K. Tso	905	Treatment of frictionless contact boundaries by direct minimization
G. D. Manolis, D. E. Beskos and M. F. Pineris	917	Beam and plate stability by boundary elements
W.-H. Chen and P. Tsai	925	Finite element analysis of elastodynamic sliding contact problems with friction

H. Adeli and Y. J. Paek	939	Computer-aided design of structures using LISP
C. P. Providakis and D. E. Beskos	957	Dynamic analysis of beams by the boundary element method
N. C. Das Gupta, H. Paul and C.-H. Yu	965	An application of geometric programming to structural design
A. Kaveh	973	An efficient flexibility analysis of structures
J. A. Puckett	979	Application of the compound strip method for the analysis of slab-girder bridges
T. Mizusawa and T. Kajita	987	Vibration and buckling of skew plates with edges elastically restrained against rotation
G. Flanagan and A. N. Palazotto	995	Composite laminate optimization program suitable for microcomputers
V. Murti and S. Valliappan	1011	Numerical inverse isoparametric mapping in remeshing and nodal quantity contouring
I. Sheinman	1023	DALS—Computer language for teaching single-degree-of-freedom dynamic analysis
A. S. Vlahinos, C. V. Smith, Jr. and G. J. Simites	1035	A nonlinear solution scheme for multistory, multi-bay plane frames
J. G. Simites, A. S. Vlahinos and G. J. Simites	1047	Sway buckling of unbraced multistorey frames
D. Greenspan	1055	Quasi-molecular, particle modeling of crack generation and fracture
		<i>Technical Notes</i>
B. P. Shastri and G. Venkateswara Rao	1063	Dynamic stability of short cantilever columns subjected to distributed axial loads
R. D. Cook	1065	On the Allman triangle and a related quadrilateral element
R. G. Friel	1069	A note on the structure of space frame stiffness equations for iterative solution storage schemes
		<i>Announcement</i>
	1071	World Congress on Computational Mechanics
